Aprašymas

The **TP-Link MC200CM** is a high-performance **fiber optic converter** designed to enhance network capabilities with a maximum data transfer rate of **1000 Mbit/s**. This device is compatible with a wide range of networking standards, including **IEEE 802.3ab**, **IEEE 802.3i**, **IEEE 802.3u**, and **IEEE 802.3z**, ensuring seamless interoperability with various network devices. Its **multi-mode SC fiber optic connector** and **Gigabit Ethernet interface** make it an ideal choice for modern networking environments.

Designed for both **full and half duplex communication**, the MC200CM operates efficiently with **CAT5** and **CAT5e** cable types. This converter excels in maintaining fiber optic connections over a maximum transfer distance of **550 meters**, utilizing a wavelength of **850 nm**. Such capabilities make it particularly suitable for extended network configurations, providing users with the flexibility to expand their network reach without compromising on speed or quality.

Housed in a sleek black casing, the **TP-Link MC200CM** is designed for wired connectivity, enhancing signal integrity and network reliability. With a peak power consumption of just **1.66 W**, this device optimizes energy use while delivering outstanding performance. The MC200CM stands out as an effective solution for those looking to enhance their network infrastructure, combining advanced technology with reliable performance.
