Aprašymas

The **TP-Link TL-SG1008P** is an advanced **unmanaged switch** designed to enhance network connectivity in both home and small office environments. With eight **Gigabit Ethernet** ports (10/100/1000), this switch ensures efficient handling of large data transfers, making it an ideal choice for users who require high-speed network connections. The model is engineered to provide a seamless experience, supporting a switching capacity of **16 Gbit/s** and a MAC address table that can store up to **4800 entries**, thereby optimizing network performance.

One of the standout features of the **TL-SG1008P** is its **Power over Ethernet (PoE)** capability, which is available on four of its ports. This innovative technology allows network cables to deliver electrical power to devices such as **IP cameras** and **wireless access points**, eliminating the need for additional power sources and simplifying installation. The switch adheres to the **IEEE 802.3af/at PoE standard**, ensuring compatibility with a wide range of PoE devices, making it a versatile solution for various networking needs.

Operating in **full duplex mode**, the **TP-Link TL-SG1008P** enables simultaneous data transmission and reception, effectively doubling the bandwidth of your network. This feature, combined with its reliable performance and robust design, positions it as a superior choice among unmanaged switches. The unit requires a **DC input voltage of 48 V** and includes a DC-in jack for easy power connectivity, making it a functional tool for expanding network capabilities without compromising on quality.
