Aprašymas

The **TP-Link TL-SM311LS** is a high-performance **fiber optic SFP transceiver** designed to enhance your network's capabilities. With its **mini-GBIC/SFP interface**, this module ensures compatibility with standard SFP slots, making it an ideal choice for various networking applications. The **maximum data transfer rate** of **1250 Mbit/s** allows for efficient data handling, ensuring that your network operates at optimal performance levels.

Utilizing **single-mode fiber optic technology**, the **TP-Link TL-SM311LS** supports data transmission over impressive distances of up to **10,000 meters** (approximately **393700.8 inches**). This capability makes it particularly suitable for extensive network configurations, such as those found in large campuses or between distant buildings. The inclusion of an **LC (UPC) connector** and compatibility with **9/125 μm fiber cables** further enhances the reliability of the connection, minimizing signal loss and ensuring consistent data integrity.

As part of TP-Link's commitment to delivering high-quality networking solutions, the **TL-SM311LS** stands out as an effective option for expanding network reach without compromising on speed or quality. This **SFP module** is an essential component for large-scale networking environments, providing a robust solution that meets the demands of modern data transmission needs. With its advanced features and reliable performance, the **TP-Link TL-SM311LS** is a valuable addition to any network infrastructure.
