Aprašymas

Ubiquiti AM-5AC21-60 - innovation tailored to your needs

The AM-5AC21-60 is a modern deflector device that guarantees high capacity, because it uses airMax ac technology.

The AM-5AC21-60 is a new generation of AirMax 2x2 MIMO 802.11ac devices. It provides scalability and perfect isolation. An innovative deflector construction with lowered side-leaves reduces the interference generated by other emitters placed in the vicinity.

Reliability

The device is designed to guarantee the highest gain and capacity in Point-to-MultiPoint networks. The antenna has an increased wave propagation. The maximum gain of the antenna is 21 dBi. The device is intended for wall mounting. It is a high quality, reliable solution.

Durable construction

The device is distinguished by an increased resistance to unfavourable weather conditions. A durable construction means that it is valued for its reliability. It works well in high network density locations.

Key features

- works in the 5 GHz band
- 21 dBi maximum gain
- Dual Linear polarisation
- 2x2 MIMO
- airMax ac
- 750 x 173 x 78 mm size

Use

The AM-5AC21-60 is used to create Point-to-MultiPoint links.

Comparison

	AM-5AC21-60	AM-5AC22-45
FREQUENCY	5 GHz	5 GHz
GAIN	21 dBi	22 dBi
DIMENSIONS*	750 x 173 x 78 mm	750 x 215 x 94 mm
BEAMWIDTH	60°	45°
POLARIZATION	Dual-Linear	Dual-Linear

*Dimensions exclude pole mount and Rocket radio (Rocket sold separately)
