Aprašymas

The **TP-Link EAP110-Outdoor** is a high-performance access point specifically engineered for outdoor environments, ensuring reliable and robust **Wi-Fi coverage**. With a maximum data transfer rate of **300 Mbps** and operating on the **2.4 GHz frequency band**, this device is ideal for extending wireless internet access in various outdoor spaces such as cafes, resorts, and educational campuses. Its compatibility with multiple IEEE standards, including **802.11b**, **802.11g**, and **802.11n**, guarantees seamless integration with a wide range of network devices.

Equipped with advanced features, the **EAP110-Outdoor** supports Ethernet LAN data rates of up to **100 Mbps**, making it suitable for data-intensive tasks. The device operates with an output voltage of **24 V** and an output current of **0.6 A**, while maintaining a maximum power consumption of just **3.12 W**. This energy-efficient design ensures continuous operation without compromising performance, setting it apart from many competitors in the market.

Designed to withstand harsh outdoor conditions, the **TP-Link EAP110-Outdoor** guarantees consistent service and reliability, regardless of the environment. Its robust construction and weather-resistant features make it an excellent choice for businesses and institutions looking to enhance their outdoor connectivity. With TP-Link's reputation for quality and innovation, the **EAP110-Outdoor** stands out as a leading solution for outdoor wireless networking needs.
