Aprašymas

Powerful OEM board with three Gigabit LAN and two miniPCle slots

The RBM33G is a fully featured RouterBOARD device perfect for using in your own enclosure or building a custom solution. It uses the same PCB form factor and same mounting holes as it's predecessors (RB433 and RB953 series).

The RBM33G features a new MediaTek two core CPU running at 880 MHz and 256 MB of DDR3 RAM and three Gigabit Ethernet ports. It is specially designed for setups that requires two 3G/LTE modems. You can use the device with e.g.:

1. two miniPCle 3G/LTE modems (two SIM slots provided);
2. two miniPCle wireless cards
3. one miniPCle and one USB 3G/LTE modem leaving other miniPCle slot for 802.11 wireless card (consult product Quick Guide for details).

The included USB 2.0/3.0 port can be used either for 3G/LTE modem or an external hard drive (consult product Quick Guide for details). For expanding storage, microSD and a PCIe M.2 slots are provided.

The RBM33G comes fitted with a RS232 serial port for console access. The device can be powered by PoE through it's gigabit ethernet connector or through the DC power jack.
