Aprašymas

The **TP-Link TL-SG108E** is a high-performance **managed switch** designed to meet the needs of modern networking environments. With its **L2 switching layer**, this switch provides advanced features that enhance network management and performance. It is equipped with **8 Gigabit Ethernet RJ-45 ports**, allowing for seamless connectivity and high-speed data transfer, making it an ideal choice for small to medium-sized businesses looking to optimize their network infrastructure.

One of the standout features of the **TL-SG108E** is its impressive **switching capacity of 16 Gbit/s**, which ensures efficient data handling and minimizes bottlenecks in network traffic. The switch supports a **MAC address table** with up to **4000 entries**, providing ample room for device connections and enhancing overall network performance. Additionally, it adheres to various **networking standards** such as **IEEE 802.1Q**, **IEEE 802.1ab**, and **IEEE 802.3x**, ensuring compatibility with a wide range of networking equipment.

Designed with reliability in mind, the **TP-Link TL-SG108E** operates on a **DC input voltage of 9 V**, making it energy-efficient while delivering robust performance. This switch is perfect for users who require a reliable and scalable solution for their networking needs. With its advanced features and solid build quality, the **TL-SG108E** stands out as a superior choice in the competitive landscape of managed switches, providing users with the tools necessary for effective network management.
