Aprašymas

Enhance your network performance with the Teltonika PR1KS210, featuring an antenna gain level of 1 dBi. Designed to operate across a wide frequency band of 0.699-0.868/1.85-2.69 GHz, this antenna ensures compatibility with a diverse range of devices and applications. The impedance is set at 50 Ω, optimizing signal strength and quality. The antenna is equipped with an SMA connector, which is male, ensuring easy and secure attachment to compatible devices. It also supports linear polarization, which can help reduce the amount of signal degradation over distances and through various obstructions. With dimensions of 30 mm in width and 82.8 mm in height, this compact antenna is suited for environments where space is at a premium but performance cannot be compromised. Each pack contains one piece, allowing for focused application in specific areas needing improved signal reception or transmission. The Teltonika PR1KS210 is a straightforward solution for enhancing network reliability and connectivity in both personal and professional settings.
