Aprašymas

The **XS+2733LC15D** is a high-performance optical transceiver designed by **MikroTik**, a renowned manufacturer in the networking industry. This product is part of MikroTik's extensive range of networking solutions, specifically tailored for high-speed data transmission. With its advanced technology, the XS+2733LC15D ensures reliable connectivity for various applications, making it an essential component for modern network infrastructures.

Featuring a **15 km range** and a **1310 nm wavelength**, the XS+2733LC15D is optimized for long-distance communication. This transceiver is compatible with various MikroTik devices, allowing for seamless integration into existing networks. Its **LC connector** type ensures a secure and efficient connection, minimizing signal loss and maximizing performance.

With a data rate of **up to 25 Gbps**, the XS+2733LC15D is designed to handle high-bandwidth applications, making it ideal for data centers, enterprise networks, and service providers. The product adheres to industry standards, ensuring compatibility and reliability across different platforms. Its robust design guarantees durability, making it suitable for both indoor and outdoor installations.

The **XS+2733LC15D** model exemplifies MikroTik's commitment to quality and innovation in the networking field. By choosing this transceiver, users can expect enhanced network performance and stability. Whether for upgrading existing systems or building new ones, the XS+2733LC15D is a valuable addition to any networking setup.
