Aprašymas

The **TP-Link Omada AC1200 Wireless MU-MIMO Gigabit Wall Plate Access Point** (model: EAP235-Wall) is designed to deliver exceptional wireless performance with a maximum data transfer rate of **1167 Mbit/s**. This device operates on dual bands, providing **300 Mbit/s** on the **2.4 GHz** band and **867 Mbit/s** on the **5 GHz** band, ensuring a seamless and efficient internet experience for multiple users simultaneously. Its advanced **MU-MIMO technology** allows for simultaneous data streaming to multiple devices, significantly enhancing network efficiency and user satisfaction.

Security is a top priority with the EAP235-Wall, as it supports a wide range of security protocols including **WPA**, **802.1X RADIUS**, and **HTTPS**. This ensures robust protection for your network, making it suitable for various environments, from small offices to larger enterprises. Additionally, the access point features multiple SSIDs, allowing for the creation of separate networks within the same physical infrastructure, which is ideal for guest access or departmental segregation.

Equipped with an **Ethernet (RJ-45) WAN connection** and supporting both active and passive **Power over Ethernet (PoE)**, the EAP235-Wall offers flexible installation options while maintaining a typical power consumption of **24.4 W**. Its sleek white exterior and integrated LED indicators for LAN, power, status, WAN, and WLAN provide a modern aesthetic and clear operational status at a glance. With compatibility across various IEEE standards, including **802.11a**, **802.11ac**, **802.11b**, **802.11g**, **802.11n**, and **802.1x**, this access point is a versatile solution for expanding your wireless network capabilities.
