Aprašymas

The **MikroTik RBWAPR-2ND_R11E-LR2** is a powerful IoT gateway designed to meet the demands of modern networking. Equipped with a **650 MHz processor** and **64 MB of RAM**, this device ensures efficient data processing and reliable performance. Its robust architecture makes it suitable for various applications, from home automation to industrial IoT solutions.

This gateway features a single **10/100 Mb/s Ethernet port** that supports **Power over Ethernet (PoE)**, allowing for convenient installation and energy management. The PoE capability simplifies the deployment process, eliminating the need for additional power sources and providing flexibility in placement.

With built-in **2.4 GHz 802.11b/g/n Dual Chain wireless connectivity**, the RBWAPR-2ND_R11E-LR2 offers a solid connection with a maximum data transfer rate of **300 Mbit/s**. This ensures smooth communication within networks, making it an ideal choice for environments that require reliable wireless performance.

In summary, the **MikroTik RBWAPR-2ND_R11E-LR2** is a versatile and efficient IoT gateway that combines essential technical features with ease of use. Its powerful processing capabilities, PoE support, and robust wireless connectivity make it a valuable addition to any network infrastructure, catering to both residential and commercial needs.
