Aprašymas

The Teltonika RUT241 is a cellular network router designed for robust industrial applications. It features a compact, durable design with a black aluminum and plastic housing suitable for DIN-rail mounting. This device supports Gigabit Ethernet with data rates up to 1000 Mbit/s and complies with IEEE 802.3 and IEEE 802.3u standards. For wireless connectivity, the router is equipped with IEEE 802.11b/g/n Wi-Fi standards, ensuring compatibility with a wide range of devices. It offers cellular network support across 2G, 3G, and 4G (LTE Cat 4 up to 150 Mbps) bands, making it versatile for various regional networks in Europe, the Middle East, and Africa. The RUT241 includes one WAN and one LAN port, facilitating essential connectivity options for multiple devices. It also features advanced security protocols such as HTTPS, SSH, SSL/TLS, WEP, WPA-EAP, WPA-PSK, WPA2-Enterprise, and WPA2-PSK to ensure secure data transmission. This router is enhanced with digital inputs and outputs, which, along with the advanced RUTOS software, enable automation scenarios for IoT and M2M solutions. The device ensures continuous connectivity with automatic failover to backup connections, making it a robust choice for demanding industrial environments.
