Aprašymas

The **TP-Link TL-SG1005D** is an advanced **unmanaged switch** designed to enhance network connectivity for small to medium-sized business environments. With five basic switching **RJ-45 Ethernet ports** that support **Gigabit Ethernet** (10/100/1000), this device ensures robust performance and reliability. Its capability for full duplex operations allows for simultaneous data transmission and reception, significantly improving network speed and bandwidth, making it an ideal choice for businesses that require efficient data handling.

Equipped with a **MAC address table** that can accommodate up to 8000 entries, the **TP-Link TL-SG1005D** effectively manages large volumes of network traffic, ensuring smooth data transmission across multiple devices. With a switching capacity of up to **10 Gbit/s**, this switch guarantees swift and seamless data flow throughout the network. It adheres to various networking standards, including **IEEE 802.3**, **IEEE 802.3ab**, **IEEE 802.3u**, and **IEEE 802.3x**, which enhances compatibility with a wide range of network devices and ensures reliable communication.

The power supply for the **TP-Link TL-SG1005D** is managed through a **DC-in jack**, simplifying the connectivity and power setup. This model is engineered to meet the demands of modern networking, providing a straightforward solution for expanding network connections without the need for complex configuration. With its exceptional performance and ease of use, the **TP-Link TL-SG1005D** stands out as a reliable choice for businesses looking to enhance their network infrastructure.
