Aprašymas

The **TP-Link TL-SG105** is an advanced **unmanaged switch** designed for **Layer 2 switching**, making it an ideal choice for users seeking a reliable and efficient networking solution. With five **RJ-45 Ethernet ports** that support **Gigabit Ethernet** (10/100/1000), this switch meets the demands of high-speed networking environments. Each port operates in **full duplex mode**, allowing for simultaneous data transmission and reception, which significantly enhances overall network performance.

Equipped with a robust **MAC address table** that can store up to 2048 entries, the **TP-Link TL-SG105** boasts a remarkable **switching capacity** of 10 Gbit/s. This capability ensures efficient handling of traffic and data throughput, making it suitable for various applications in both home and office settings. The switch adheres to multiple networking standards, including **IEEE 802.1p**, **IEEE 802.3**, **IEEE 802.3ab**, **IEEE 802.3u**, and **IEEE 802.3x**, ensuring broad compatibility with a wide range of network devices and protocols.

Designed with flexibility in mind, the **TP-Link TL-SG105** features a **DC-in jack** for power and is wall mountable, optimizing space utilization in various environments. This switch is particularly advantageous for users who require a straightforward, high-speed network connection without the complexities of advanced management features. With its reliable performance and ease of installation, the **TP-Link TL-SG105** stands out as a practical solution for enhancing network connectivity.
