Aprašymas

The **TP-Link TL-SG108** is a high-performance **unmanaged switch** designed for **Layer 2 switching**, making it an ideal choice for both small offices and home networks. With **eight RJ-45 Ethernet ports** that support **Gigabit Ethernet** (10/100/1000), this switch meets the demands of high-speed networking, ensuring seamless connectivity for multiple devices. Each port operates in **full duplex mode**, allowing for simultaneous data transmission and reception, which significantly enhances overall network performance.

This switch features a robust **MAC address table** that can accommodate up to **4096 entries** and offers a remarkable **switching capacity of 16 Gbit/s**. Such capabilities facilitate efficient traffic management and ensure reliable data handling, making the TL-SG108 a reliable choice for various networking environments. It adheres to essential networking standards, including **IEEE 802.1p** for traffic prioritization and **IEEE 802.3x** for flow control, which guarantees broad compatibility and dependable performance.

In addition to its technical prowess, the **TP-Link TL-SG108** is designed with flexibility in mind, featuring a **wall mountable** design that optimizes space utilization. This makes it particularly suitable for environments where space is limited. With its advanced technology and reliable performance, the TL-SG108 stands out as a superior choice in the unmanaged switch market, ensuring that users can enjoy a stable and efficient networking experience.
