Aprašymas

The **XQ+85MP01D** is a high-performance **QSFP28 module** designed by **MikroTik** for short-range multimode fiber optic connections. This advanced module is engineered to meet the demands of modern networking environments, providing reliable and efficient data transmission.

Operating at a wavelength of **850 nm**, the **XQ+85MP01D** can transmit data at speeds of up to **100,000 Mbit/s**. This exceptional speed makes it an ideal choice for applications that require rapid data transfer, such as data centers and high-performance computing environments.

With its robust design and compatibility with various networking equipment, the **XQ+85MP01D** ensures seamless integration into existing systems. Its ability to support high bandwidth applications makes it a valuable asset for businesses looking to enhance their network capabilities.

In summary, the **XQ+85MP01D** by **MikroTik** is a reliable and efficient **QSFP28 module** that excels in short-range multimode fiber connections. With its impressive technical specifications and high-speed data transfer capabilities, it is well-suited for demanding networking environments.
