Aprašymas

The **Hewlett Packard Enterprise HPE Standard** is a high-performance **chassis fan** designed specifically for the **ProLiant DL380 Gen11** server series. This essential component ensures optimal airflow and cooling efficiency, maintaining the ideal operating temperature for your server. With its sleek **blue design**, this fan not only enhances the aesthetics of your server setup but also delivers reliable performance under demanding conditions.

Engineered for durability and longevity, the **HPE Standard chassis fan** features advanced technology that minimizes noise while maximizing airflow. This fan is a critical part of your server's cooling system, helping to prevent overheating and ensuring consistent performance. By choosing the **Hewlett Packard Enterprise** product line, you benefit from the expertise and innovation that HPE is known for in the server industry.

With the **HPE Standard chassis fan**, you can trust that your **ProLiant DL380 Gen11** server will operate efficiently and reliably. This component is designed to seamlessly integrate with your existing setup, providing a straightforward solution for your cooling needs. Experience the difference in performance and reliability with HPE's trusted technology.
