Aprašymas

The **TP-Link SM321A-2** is an innovative **network relay module** that delivers unparalleled data transfer speeds of up to **1250 Mbit/s**. Manufactured by the renowned networking hardware company **TP-Link**, this model combines robust construction with cutting-edge technology, making it a top choice for professionals seeking reliability and performance.

This **SFP module** utilizes **fiber optic technology**, providing significantly broader data transfer capabilities compared to traditional wired solutions. Notably, the **Hot Pluggable** technology allows for installation and replacement of the device without the need to power down the entire network system, ensuring minimal disruption to operations.

The **TP-Link SM321A-2** prioritizes stability and reliability, offering excellent performance even in varying temperature conditions ranging from **-40 to +85 degrees Celsius**. With the use of the **single-mode transmission standard LX/LH**, the device's operational range extends up to **10 km**, making it an ideal solution for businesses and institutions with extensive territorial reach. Additionally, its compatibility with most devices on the market simplifies installation and integration into existing systems.
