Aprašymas

Extralink Patchcord LAN network cable - 3 meters long. This network cable from Extralink is a 3-meter long LAN patchcord copper cable. A LAN Patchcord is a basic element of computer networks operating in the Ethernet standard. It is used to directly connect two active devices, such as routers and switches, so that data can be transferred between them. It is also used to connect computers or VoIP phones for structured cabling and to perform patch panel switching in IT cabinets. It is perfect for both large and small computer networks. This shielded patchcord from Extralink is highly flexible, which translates into installation convenience and user comfort.
