Aprašymas

The **Intel Xeon Silver 4410Y** is a powerful processor designed specifically for the **server** market, offering exceptional performance for enterprise applications. With a **processor type** of **Intel® Xeon Silver** and a **socket type** of **LGA 4677 (Socket E)**, this processor is engineered to handle demanding workloads efficiently. The **maximum supported memory** of **6 TB** and **eight-channel memory support** ensure that your server can manage extensive data processing tasks seamlessly, making it an ideal choice for data-intensive environments.

Equipped with advanced instruction sets such as **AMX**, **SSE4.2**, **AVX**, **AVX 2.0**, and **AVX-512**, the **Intel Xeon Silver 4410Y** excels in delivering high-performance computing capabilities. This processor also supports a maximum enclave size for **Intel® SGX** of **64 GB**, enhancing security for sensitive data processing. Additionally, the inclusion of the **Intel® Data Streaming Accelerator (DSA)** with one default device further optimizes data handling, providing a significant advantage over competing processors in the same segment.

As a product of **Intel**, a leader in semiconductor technology, the **Intel Xeon Silver 4410Y** stands out in its class for its reliability and performance. This processor is packaged in a **retail box**, ensuring that you receive a quality product ready for deployment in your server or enterprise environment. With its robust specifications and cutting-edge technology, the **Intel Xeon Silver 4410Y** is an excellent choice for businesses looking to enhance their computing power and efficiency.
