Aprašymas

This network camera features a 4MP resolution that captures high-quality, detailed images, ensuring clear visibility in various lighting conditions. It is equipped with smart dual-light technology which combines both infrared and white light illumination. This allows the camera to switch modes based on environmental conditions, enhancing night vision capabilities and providing color detail in low light situations.

The device includes a fixed-focal lens with a 2.8mm focal length, offering a wide field of view for comprehensive coverage. It supports advanced image processing technologies such as 3D noise reduction and wide dynamic range, which improve video clarity and contrast.

Designed for outdoor use, the camera has an IP67 rating, confirming its dust and water resistance, making it suitable for various weather conditions. It also features intelligent motion detection powered by AI, which helps in distinguishing human and vehicle movements, reducing false alarms and increasing the accuracy of event detection.

Integration capabilities with various third-party software through its support for ONVIF protocols make this camera versatile for different security setups. It also includes options for both local and network storage, accommodating different data management needs.
