Aprašymas

Equipped with an 8MP sensor, this network camera delivers high-resolution images, ensuring detailed and clear footage. The fixed-focal lens is designed to provide a consistent field of view, making it suitable for monitoring specific areas without the need for adjustment. Featuring smart dual-light technology, the camera combines both infrared and white light illumination, allowing it to capture full-color video in low-light conditions and switch to infrared mode in complete darkness.

This model incorporates WizSense technology, which enhances its capabilities with advanced artificial intelligence features such as perimeter protection and smart motion detection. These features are designed to reduce false alarms caused by non-human moving objects and improve the accuracy of real-time alerts.

The camera's design includes a durable, weather-resistant casing that makes it suitable for both indoor and outdoor use. It supports Power over Ethernet (PoE) for simplified installation, as it requires only a single cable for both power supply and data transmission. Additionally, the camera is compatible with various third-party software through its ONVIF compliance, ensuring versatility in integration with existing security systems.
