Aprašymas

This network video recorder features an 8-channel recording capability, designed to support high-definition video from multiple camera feeds simultaneously. It is housed in a compact 1U chassis, making it suitable for space-efficient setups in various environments. The device includes eight Power over Ethernet (PoE) ports, which simplify the installation process by allowing both power and data to be transmitted over a single network cable.

Equipped with a single hard drive slot, it allows for ample storage of video footage, which can be crucial for both security and monitoring purposes. The inclusion of WizSense technology enhances the unit's functionality by providing advanced intelligent features such as motion detection and analytics, improving the efficiency and effectiveness of video surveillance operations.

The recorder operates efficiently within a wide range of temperatures and comes with a user-friendly interface, ensuring ease of use and management. It supports various video compression formats, including H.265, which helps in optimizing storage space without compromising video quality. This device is suitable for businesses and individuals seeking a robust and efficient video surveillance solution.
