Aprašymas

This network video recorder features an 8-channel recording capability and supports up to 8 Power over Ethernet (PoE) inputs. Its compact 1U size ensures it fits easily into various environments without requiring extensive space. The device includes a single hard drive slot, allowing for ample storage of video footage.

Equipped with WizSense technology, the recorder enhances its functionality with deep learning algorithms designed to improve efficiency and accuracy in video surveillance operations. These algorithms specifically focus on human and vehicle detection, reducing false alarms and increasing the relevance of recorded video.

The unit supports a maximum resolution of 12MP for recordings, ensuring high-quality video output. It also offers compatibility with various third-party IP cameras, which provides flexibility in building or integrating with existing surveillance systems. Additionally, the recorder features an intuitive interface and remote access capabilities, allowing for convenient monitoring and management from different locations.

This product is suitable for small to medium-sized installations in both residential and commercial settings, providing a robust solution for security and surveillance needs.
