Aprašymas

Equipped with a 4 MP high-resolution sensor, this fixed turret network camera delivers clear and detailed images, ensuring effective surveillance and security. The device features ColorVu technology, which provides vivid color rendering and full-time color imaging, even in low-light environments. This capability is enhanced by an integrated supplemental light that illuminates scenes in complete darkness.

The camera supports both high-quality video compression standards, H.265+ and H.264+, which optimize bandwidth and storage without compromising video quality. It is designed with a fixed 4mm lens that offers a wide field of view, suitable for monitoring large areas.

For versatile application, the camera includes smart features such as motion detection, video tampering alarms, and a built-in microphone for real-time audio security. It is housed in a durable, water and dust resistant enclosure (IP67 rated), making it suitable for outdoor use in various weather conditions.

Installation is facilitated by Power over Ethernet (PoE) technology, allowing both power and data to be carried over a single network cable, simplifying deployment and reducing installation costs.
