Aprašymas

This product is an unmanaged POE switch designed to facilitate efficient network configurations. It features 24 Gigabit Ethernet ports that provide high-speed connectivity and support for Power over Ethernet (PoE). With a total PoE power budget of 370 watts, it can effectively power multiple devices such as IP cameras, VoIP phones, and wireless access points directly through the network cables, simplifying installation and reducing cable clutter.

The device supports a maximum data transfer rate of 1000 Mbps, ensuring rapid transmission of information across the network. It is built to handle a switching capacity of 56 Gbps, which allows for the handling of large amounts of data without congestion. The switch operates on a simple plug-and-play setup, requiring no additional configuration, which makes it suitable for a variety of uses in both commercial and residential settings.

Its durable metal casing is designed to withstand rigorous use and its rack-mountable design allows for easy integration into standard server racks, making it a versatile addition to any network system. The switch also features fanless design for quiet operation.
