Aprašymas

This network video recorder (NVR) supports up to 16 channels and is housed in a compact 1U chassis, making it suitable for space-efficient installation in various environments. It is capable of recording and playing back 4K video, ensuring high-resolution imaging for security and surveillance purposes. The device features AcuSense technology, which enhances its ability to accurately detect and classify humans and vehicles in video feeds, reducing false alarms and improving security efficiency.

With a built-in deep learning algorithm, this NVR offers advanced analytics such as line crossing and intrusion detection, which are more precise compared to conventional methods. It supports H.265+ video compression technology, which significantly reduces bandwidth and storage requirements while maintaining high-quality video output.

The unit includes HDMI and VGA outputs, allowing for simultaneous video output to multiple displays. It also features two SATA interfaces for increased storage capacity, supporting up to 10TB per disk. Network connectivity is facilitated through a 1 RJ-45 10/100/1000 Mbps self-adaptive Ethernet interface, ensuring robust and flexible network integration.
