Aprašymas

This industrial-grade router is designed for robust connectivity in various environments, including remote and industrial settings. It supports 4G LTE CAT4, which provides high-speed data transfer rates up to 150 Mbps download and 50 Mbps upload, ensuring efficient and stable internet connections. The device is equipped with dual-SIM functionality, allowing for network redundancy and increased connection reliability without interruptions. The router features three Ethernet ports for wired connectivity and can also function as a Wi-Fi access point, supporting IEEE 802.11b/g/n standards. This allows multiple devices to connect wirelessly, making it suitable for both office and field operations. It is built with advanced security features, including firewall and numerous VPN protocols, to safeguard sensitive data and maintain secure communications. Encased in a durable, compact metal housing, this router is designed to withstand harsh conditions and varying temperatures, making it suitable for installation in challenging industrial environments. It also supports various power supply options, including PoE (Power over Ethernet), enhancing its flexibility for deployment without the need for additional power sources.
