Aprašymas

The **MikroTik XS+85LC01D** is a high-performance **SFP28 transceiver** designed for fiber optic connections. This product is ideal for network professionals seeking reliable and efficient data transmission solutions. With its robust design and advanced technology, the XS+85LC01D ensures seamless integration into various networking environments.

Featuring a maximum data transfer rate of **25000 Mbit/s**, the MikroTik XS+85LC01D supports high-speed connectivity for demanding applications. This transceiver operates over fiber optic cables, providing enhanced bandwidth and reduced latency, making it suitable for data centers, enterprise networks, and service providers.

The **interface type** of this transceiver is **SFP28**, which allows for compatibility with a wide range of networking equipment. Its sleek **stainless steel** color not only adds to its aesthetic appeal but also contributes to its durability and longevity in various operational conditions.

Included in the package is **one unit** of the MikroTik XS+85LC01D, making it a convenient choice for those looking to upgrade their network infrastructure. With its exceptional technical specifications and reliable performance, this transceiver is a valuable addition to any professional networking setup.
