Aprašymas

The **OM4 multi-mode fibre** is designed to provide superior performance for high-speed data transmission. This advanced fibre optic cable is ideal for applications requiring high bandwidth and long-distance communication, making it a perfect choice for data centers and enterprise networks. With its enhanced modal bandwidth, the OM4 fibre ensures efficient data transfer, significantly reducing signal loss compared to previous generations.

Equipped with **Duplex LC UPC connectors**, this product guarantees a reliable and secure connection. These connectors are known for their low insertion loss and high return loss, which contribute to the overall performance of the network. The OM4 fibre's compatibility with various networking equipment makes it a versatile solution for both new installations and upgrades, ensuring seamless integration into existing systems.

Available in a range of cable lengths from **0.5 to 30 m**, this fibre optic cable can be tailored to meet specific installation requirements. The flexibility in length allows for optimal routing and organization within the network infrastructure. Manufactured with precision and quality in mind, this product stands out in the market, providing a robust solution for high-performance networking needs.

Techninė specifikacija

Matmenys ir svoris

Matmenys (I × P × A)	18,00cm × 18,00cm × 2,00cm
Svoris	0,10kg
