Aprašymas

The **UniFi 25G SFP28 Transceiver** is a high-performance networking component designed to enhance your connectivity experience. With supported data rates of **25 / 10 / 1 Gbps**, this transceiver ensures rapid data transmission, making it an ideal choice for demanding network environments. Its compatibility with **SFP28, SFP+, and SFP interfaces** allows for versatile integration into existing systems, providing users with the flexibility they need for various applications.

One of the standout features of the **UniFi 25G SFP28 Transceiver** is its **auto-optimisation of link speed and stability** when interconnecting with other UniFi devices. This technology not only simplifies the setup process but also enhances overall network performance, ensuring that your data flows smoothly without interruptions. This capability sets it apart from many competitors in the market, making it a superior choice for both residential and commercial networking solutions.

Designed for cable lengths ranging from **0.15 to 30 m**, the **UniFi 25G SFP28 Transceiver** offers flexibility in deployment, allowing users to tailor their network layout according to specific needs. Manufactured by **Ubiquiti Networks**, a leader in innovative networking solutions, this product is built to meet the demands of modern connectivity while ensuring reliability and performance. Experience the difference with the UniFi line and elevate your networking capabilities.
