Aprašymas

The **UniFi 25G SFP28 Transceiver** is a high-performance networking solution designed for seamless connectivity in modern data centers and enterprise networks. With supported data rates of **25 / 10 / 1 Gbps**, this transceiver ensures efficient data transmission, making it ideal for bandwidth-intensive applications. Its compatibility with **SFP28, SFP+, and SFP interfaces** allows for versatile integration into existing network infrastructures, providing flexibility and scalability for future growth.

One of the standout features of the **UniFi 25G SFP28 Transceiver** is its **auto-optimisation of link speed and stability** when interconnecting UniFi devices. This advanced technology not only enhances performance but also simplifies network management, ensuring that your connections remain reliable and efficient under varying loads. This capability sets it apart from many competitors, making it a preferred choice for professionals seeking robust networking solutions.

Designed for use with cable lengths ranging from **0.15 to 30 m**, the **UniFi 25G SFP28 Transceiver** offers flexibility in deployment, allowing you to tailor your network layout to meet specific requirements. Manufactured by **Ubiquiti Networks**, a leader in innovative networking technology, this transceiver exemplifies quality and reliability, making it an essential component for any high-speed network setup.
