Aprašymas

The **TP-Link JetStream** managed switch (model: **SG3428XPP-M2**) is engineered to fulfill the demands of high-speed networking and advanced management. With 24 RJ-45 Ethernet ports supporting 2.5G Ethernet speeds, this switch significantly enhances bandwidth and performance for data-intensive applications. Additionally, it features four 10GE SFP+ ports for high-speed fiber connections, making it an ideal choice for businesses that require robust networking solutions.

This switch supports **Layer 2+ (L2+)** management features, facilitating efficient network setup and management. The console port is accessible via **RJ-45** or **micro-USB**, providing flexibility for configuration and maintenance. Operating in **full duplex mode** allows for simultaneous data transmission and reception, effectively doubling the bandwidth. With a large **MAC address table** accommodating **32,000 entries** and a substantial **switching capacity** of **200 Gbit/s**, this switch is built to handle demanding network environments.

Equipped with **Power over Ethernet (PoE)** capabilities, the **TP-Link SG3428XPP-M2** can power devices such as **IP cameras** and **wireless access points** directly through network cables, simplifying installations and reducing cable clutter. This unit is designed for **rack mounting** and occupies **1U of rack space**, making it a space-efficient solution for any network setup. Adhering to multiple networking standards, including **IEEE 802.1d** and **IEEE 802.1q**, ensures compatibility with a wide range of network protocols, further solidifying its position as a reliable choice for advanced networking needs.
