Aprašymas

The **FIBRAIN FTF-S1XG-S31L-010D-CI** is a high-performance **SFP+ module** designed for use in 10GBase-LR networks. With a remarkable transmission speed of **10GB**, this module is capable of achieving distances up to **10 kilometers** by utilizing a wavelength of **1310nm**. It is compliant with **IEEE802.3-2005 10G BASE-LR** standards, ensuring reliable and efficient connectivity in various networking applications.

This module features an **LC Duplex** SFP interface and operates within a wide temperature range of **-25 to 70 degrees Celsius**, making it suitable for challenging environments. The integrated Digital Diagnostic Monitoring (DDM) capability allows for real-time monitoring of the module's performance, ensuring optimal operation and easy troubleshooting. With a low power consumption of only **1W**, this module is designed to provide energy-efficient networking solutions.

FIBRAIN, a leading manufacturer in the field of optical communication, guarantees that the **FTF-S1XG-S31L-010D-CI** module meets the highest industry standards, making it a reliable choice for enhancing your network infrastructure. Experience unparalleled performance and stability with this superior product, crafted with cutting-edge technology in mind.
