Aprašymas

The **LENOVO ThinkStation PGX** is a cutting-edge workstation designed for professionals who demand top-tier performance and reliability. Powered by the **NVIDIA Grace Blackwell GB10** processor, this system is equipped with **128 GB of unified memory** and a **1 TB SSD**, ensuring rapid data access and seamless multitasking capabilities. The **NVIDIA Blackwell GPU** enhances graphical performance, making it ideal for intensive computational tasks such as AI development, data analysis, and 3D rendering.

With a robust **Mini Tower** chassis, the ThinkStation PGX offers a range of connectivity options including **HDMI**, **QSFP**, **RJ-45**, and **USB4** ports, allowing for versatile integration into any workspace. The system runs on the **NVIDIA DGX OS**, which is optimized for AI workloads, providing a streamlined user experience and maximizing productivity. This workstation stands out with its exceptional processing power and advanced GPU capabilities, making it a superior choice for professionals in need of high-performance computing solutions.

As part of the **ThinkStation** family, the PGX series is backed by Lenovo's commitment to quality and innovation. The combination of advanced technology and thoughtful design ensures that users can tackle demanding projects with confidence. Whether you are in research, engineering, or creative industries, the **LENOVO ThinkStation PGX** is engineered to meet your most rigorous demands.
