Aprašymas

The **TELTONIKA NETWORKS RUT145** is an industrial-grade router designed for communication in demanding industrial environments. With native support for the **RS485 protocol**, it excels in automation and production applications, allowing seamless connectivity between devices and IP networks. The RUT145 combines both **Ethernet** and **Wi-Fi** functionality, making it a versatile solution for a variety of applications.

This router offers efficient connectivity with **Ethernet** ports (2 x RJ-45 10/100 Mbps) and supports the **Wi-Fi 802.11b/g/n (Wi-Fi 4)** standard, enabling simultaneous connections for up to **50 users**. This makes it an ideal choice for environments with high data traffic. Furthermore, the RUT145's native **RS485 support** simplifies integration with existing industrial systems, allowing users to manage multiple devices on a single RS-485 bus, significantly streamlining network infrastructure.

Designed for extreme conditions, the RUT145 operates within a temperature range of **-40 °C to +75 °C**, making it suitable for harsh industrial applications where other devices may fail. The router is equipped with advanced security features, including a built-in firewall and intrusion detection, ensuring a high level of network protection. Additionally, it operates on the **RutOS** system, providing a suite of tools for network management and monitoring, along with remote management capabilities through the **RMS platform**.
