Aprašymas

TRANSFORM YOUR SPACE WITH POWERFUL AI-DRIVEN AUDIO

The Ubiquiti AI Speaker redefines indoor audio experiences with its impressive 100 dB output, ensuring clear and powerful sound in any environment. Designed for versatility, this speaker can be easily surface or flush mounted, adapting seamlessly to various settings. Its compact dimensions of 268.5 x 192 x 83.5 mm make it an unobtrusive addition to your space, while the robust polycarbonate enclosure ensures durability. With a frequency range of 150 Hz to 20 kHz, this speaker delivers rich, full-range audio that enhances any atmosphere, whether for announcements, alerts, or background music.

SMART FEATURES FOR ENHANCED COMMUNICATION AND ALERTS

Equipped with advanced AI capabilities, the Ubiquiti AI Speaker is not just a speaker; it's a smart communication tool. The integration of AI alerts allows for timely notifications, making it ideal for both commercial and residential applications. The mono sound output is designed to provide clear audio across a 90° coverage area, ensuring that messages are heard loud and clear. Additionally, the speaker features a Power over Ethernet (PoE++) connection, simplifying installation and reducing cable clutter, while maintaining a maximum power consumption of just 33W.

RELIABLE PERFORMANCE IN ANY ENVIRONMENT

Built to withstand a range of conditions, the Ubiquiti AI Speaker operates effectively in ambient temperatures from 0 to 40°C (32 to 104°F) and humidity levels of 10 to 90% non-condensing. This reliability makes it suitable for various indoor environments, from offices to retail spaces. The speaker is also NDAA compliant and certified by FCC, IC, and CE, ensuring it meets stringent safety and performance standards. With a sensitivity rating of 87 dB and a maximum sound pressure level of 100 dB at 1 meter, this speaker is engineered to deliver consistent audio performance, making it a dependable choice for any audio application.
