Aprašymas

Optimize the realism and comfort of your piloting sessions with a configuration of the joystick in the central position. With AVA Offset Adapter, you can adjust the orientation of the joystick on the AVA base to 15° or 30°, providing more realistic immersion and comfort. Don't waste time making adjustments, thanks to an easy and sturdy mounting system that doesn't require you to dismantle the base, incorporating a ring similar to the ring on Thrustmaster joystick grips.

ENHANCED REALISM

Increase the realism and comfort of your flight sessions with the joystick in the central position, thanks to AVA Offset Adapter. This 2-inch / 5-cm metal extension for the AVA base lets you adjust the position of Thrustmaster joystick grips to 15° or 30°.

READY FOR TAKEOFF

AVA Offset Adapter was designed to simplify the mounting process for Thrustmaster joysticks. Thanks to a ring similar to the ring on Thrustmaster joystick grips, you can install a new grip without having to dismantle the AVA base.

THE FUTURE OF FLIGHT SIMULATION

Explore the range of possible configurations of the scalable AVA base, thanks to its vast ecosystem of current and future accessories (additional grips, extensions, cams, springs, dampers, cyclical brake...).

T.A.R.G.E.T advanced programming software** on PC

T.A.R.G.E.T is a software suite allowing users to test, configure and program Thrustmaster controllers. In this way, T.A.R.G.E.T allows for total interaction between different Thrustmaster USB controllers, with simplified configurations in simulators, and the use of a single preset for all controllers, rather than having to use as many different presets as controllers. Finally, T.A.R.G.E.T includes built-in presets for well-known games (both recent and older titles), and lets users create new presets too.

Techninė specifikacija

Specifications	
Sandėlio grupė	Gaming Controllers [+127][-18]
Features	
Product type	Flight base mount adapter
Product colour	Black
Quick release system	Yes
Compatible products	AVA
Compatible games	-DCS – PC -Xplane 11 & 12 – PC -Microsoft Flight Simulator 2020 – PC -Star Citizen – PC - Elite Dangerous – PC -War Thunder – PC
Weight & dimensions	
Width	40 mm
Depth	40 mm
Height	58 mm
Weight	100 g
