Aprašymas

Get maximum pain relief with the Balance keyboard, designed to work in tandem with RollerMouse and SliderMouse models. Its height is the same as these centred mice, minimizing the gap between keys and the rollerbar or sliding navigation pad, for effortless switching between typing and navigation. The adjustable downward tilt helps maintain a natural wrist position by keeping the line of your wrist unbroken. This prevents strain on muscles and ligaments while your arms remain in a comfortably natural position in front of you. Get even more wrist and hand support with a Balance Keyboard wrist rest. The width of the Balance Keyboard aligns perfectly with RollerMouse Red, so you can keep that optimal central alignment between hands, body, keyboard and mouse to reduce strain and pain.

While optimised for centred mice, the Balance keyboard also complements the one-handed Unimouse. Its compact, fully functional design reduces the need for extended reach, minimizing shoulder strain. With a dedicated numeric pad and navigation shortcut keys, it ensures an efficient typing experience while reducing the distance to access the mouse, making it ideal for reducing shoulder discomfort.
