Aprašymas

This 12-in-1 docking station makes it possible to expand your device's USB Type-C capacity with HDMI/VGA/USB-C PD/USB-C data/USB 3.0/USB 2.0/SD/TF/GbE/AUX ports. The adapter provides an easy way to add HDTV, or equipment such as a monitor or projector to any USB-C device such as a smartphone, portable gaming console, MacBook, Chromebook Pixel or any similar late-model laptop with USB-C ports. The multiport video adapter lets you mirror or extend content on three additional monitors simultaneously (2 x HDMI, 1 x VGA), creating a triple-screen workstation.

Multi Stream Transport, or MST, is a means of connecting one or more monitors together via a single display port. This technology makes it possible to connect say, three monitors to a laptop, using a docking station. This works by combining multiple video signals into one single stream and then 'unpacking;' them again on the display side. MST works on any Windows® device that supports DP Alt Mode (DisplayPort Alternate Mode), using

USB-C.
Perfect for home entertainment, office presentations and classroom teaching.
