## Pagrindinės savybės

- ✓ **EFFICIENT ENCLOSURE:** The external JBOD enclosure offers space for four SATA III hard drives in 3.5" format. The enclosure is simply powered with the included 60W power supply
- ✓ **TOP SPEED:** The enclosure is connected to the PC via USB 3.0 and thus enables transfer speeds of up to 5 Gbit/s. A USB plug is included. A USB plug is included
- ✓ **SINGLE MODE:** Each drive is recognised individually so that all HDDs can be accessed separately. The enclosure is supported by both Windows and MacOS
- ✓ **STATUS-LED:** Via the LED display you can always see which HDD is being accessed or if there are errors. The synchronised standby mode also saves energy
- ✓ **OPTIMAL COOLING:** The 80 mm fan (3 levels of temperature control) ensures sufficient cooling of the hard disks. It optimally dissipates the heat generated from the enclosure

## Aprašymas

### No more "Double Trouble"

In case two HDDs are not enough: In this wonderful JBOD (=Just a bunch of disks) enclosure, four 3.5" HDDs can be mounted. Without using any screws, the HDD can be mounted and replaced. Even while in operation.

### The smart fan

The fan has a quick reaction when the temperature changes inside the enclosure. This way, your important data is constantly protected against

heat. In case you would like to set it manually, you can still set it on one of the three available fan persets.

#### For the environment

If the host cable (USB 3.0 or eSATA) is not connected, or when the device is not being used it turns itself into Standby mode automatically. In addition, each HDD has an LED indicator in order to provide information regarding HDD activity (read/write), fan settings and connection.
