Aprašymas

Vibrant, Accurate Colour

The Full HD (1920x1080) screen offers clear colour reproduction on the 31.5-inch screen with 1500R curvature.

Fluid visuals.

Seamless workflow.

The 100Hz refresh rate provides a smooth frame loading for realistic gameplay with less screen stuttering and motion blur.

Reader mode

Reader Mode adjusts colour temperature and luminance, supporting a suitable viewing experience for reading on a monitor.

AMD FreeSync™

AMD FreeSync™ technology helps reduce the tearing and stuttering that occur between a graphic card's frame rate and a monitor's refresh rate.

Thanks to FreeSync™, gaming enthusiasts can experience seamless, fluid movement throughout hi-res, heavy-duty games.

Black Stabiliser

Black Stabiliser Mode brightens dark areas and gives you better visibility in dark scenes. It can make dark areas brighter to help you find the enemy or game objectives hidden in the dark.

Streamlined control

Easily control display settings with a few clicks using OnScreen Control software. You can also readily divide the whole display area with Screen Split.

Versatile Design

The monitor has a slim bezel on three sides and tilt adjustment*.
