Pagrindinės savybės

- ✓ Compatible with HDMI 4K2K@60Hz, HDCP 1.2 and DVI 1.0
- ✓ HDMI audio sampling rate up to 192 kHz
- ✓ Optical S/PDIF audio sampling rates up to 192 kHz
- ✓ HDMI supports high bit rate audio (HBR)
- ✓ No HDMI output connection is required for audio reception on the analog and optical outputs
- ✓ Up to 4x 3.5 mm jack plugs possible for analog multi-channel audio outputs
- ✓ The maximum length of HDMI input and output HDMI cable is up to 15 meters at 1080p 8-bit resolution or 10 meters at 1080p 12-bit resolution
- ✓ Integrated audio EDID switching between LPCM 7.1CH, TV EDID (external) and bitstream audio
- ✓ CEC compatible
- ✓ 4K2K resolution and 3D signal

Aprašymas

With the HDMI audio extractor you can extract the original HDMI audio signal and convert it into digital optical or analog multi-channel audio signals. This allows you to output the audio signal to external speakers or extend the path of the audio signal. The extractor is used e.g. when the image display does not support sound. When connected to a 4K2K display at the same time, the video is displayed without downgrading the resolution.

Note:When displaying an HDMI 4K2K signal, an equivalent source signal, output display and HDMI cables are required to ensure the best image display.
