- ✓ USB-C Input: 18.0 – 23.0V = 5.0A Max 100W Max
- ✓ Output: 20.0V = 4.5A Max, 90W Max

Aprašymas

Overview

Have a USB-C power charger, but your laptop's power connector requires a legacy/barrel-type connector? With the USB-C® to Legacy Power Adapter you can now easily connect your USB-C power adapter to charge your non-USB-C laptop. Simply connect your USB-C charger to the converter and choose from one of the five provided 3-pin power tips to connect to your laptop. Ultra-compatible, this adapter works with most Acer, ASUS, Compaq, Dell, Fujitsu, Gateway, HP, IBM, Lenovo, and Toshiba legacy host devices.

A Cost-Effective Solution to Update your Power Connector

While USB-C power chargers become more prevalent, there are still plenty of host devices with non-USB-C power connectors. No need to upgrade your device just to support the new standard. Whether you're in need of a replacement charger or are looking to use a single power adapter to

connect and charge varying devices, you can easily take any USB-C power adapter (sold separately) and connect it to the Targus® USB-C® to Legacy Power Adapter to convert a USB-C power connection to a legacy/barrel-type connection.

A Plug & Play Experience

Connect and charge instantly with USB-C power. No drivers required.

Ultra-Compatible Charging Solution

Perfect for mixed-device environments, the adapter's included 5-tip system supports most major legacy laptop devices including those of Acer, ASUS, Compaq, Dell, Fujitsu, Gateway, HP, IBM, Lenovo, and Toshiba.
