- ✓ 360° rotation adjustment
- ✓ Smart scene linkage
- ✓ Paste and use
- ✓ 1 year long standby

Aprašymas

The motion sensor captures the infrared light emitted by the human body through a lens, thereby sensing the presence of a living body. It can still play a role even in dark occasions, it generates small data traffic, does not easily violate user privacy, has low power consumption, long standby time and easy to install. It can effectively detect intrusion information and generate alarm linkage.
