Aprašymas

People & Vehicle Analytics

Search and filter to people or vehicle of interest based on many different attributes, making post-event search faster and easier.

Human & Vehicle Classification

Distinguish humans and vehicles from other objects and receive more accurate event notifications.

Smart Video Enhancement Technology

- True WDR: By analyzing and blending different exposures, True WDR ensures both bright and dark areas remain properly exposed, delivering a

well-balanced and natural-looking image even in environments with high-contrast lighting.△

- Smart IR: Smart IR dynamically adjusts infrared lighting to prevent overexposure and glare, improve visibility at different distances, and ensure clearer footage.
- 3D DNR: 3D DNR is a noise reduction technology that analyzes image data across frames to selectively reduce noise while preserving important details.
- White Balance: White Balance ensures that white appears neutral in an image, regardless of the lighting conditions.
