Pagrindinės savybės

- ✓ For resolutions up to 4K@60Hz
- ✓ All pins connected include power pin 20
- ✓ For applications where DisplayPort power is needed like not external powered converters

Aprašymas

DisplayPort is mainly used for connecting a video source to, for example, a monitor, but it can also be used to send data. A DisplayPort connector is quite similar to a HDMI connector, except that there is only one bevel on the side of the connector and not two bevels as with HDMI. The DisplayPort signal is not fully compatible with a HDMI or DVI signal.
