### Dual-channel detection powered by IMOU SENSE

IMOU SENSE is a self-developed AI algorithm under the IMOU brand. Each of the two lenses of the Cruiser Dual 2 uses its own algorithm, which doesn't degrade the accuracy due to an increase in the number of lenses, giving it a 50% increase in overall accuracy and delivering the detection results back to you within 0.02 seconds.

### IMOU All-day Saving Recording Mode

In AOR mode, the camera records full-frame video only when an event is detected, and 1 second/frame at all other times. This meets the need for all-day video recording and saves storage space significantly, allowing more video to be stored on a smaller memory card.

### Accurate human and vehicle detection

Powered by IMOU SENSE, the newly upgraded AI human and vehicle detection can effectively reduce false alarms caused by mosquitoes and tree shaking. The effective detection range can reach 22 meters for persons and 44 meters<sup>1</sup> for cars, respectively ensuring that detection is truly "accurate".

### Customize your algorithmic matrix with Algo Play

You can choose and download the algorithms you want through Algo Play to make the IMOU product exactly what you need, and the algorithms will be updated and continuously upgraded to improve your experience.
