Aprašymas

Bullet 2S

A Colorful World, Even at Night

Smart Color Night Vision

Four smart night vision modes provide clear full color pictures even in complete darkness.

Smart Color Night Vision

When it gets too dark the spotlights activate on low brightness. If motion is detected the spotlights will shine brightly.

Bright Color Night Vision

When it gets too dark the spotlights shine brightly and the video will be in color.

Subtle Color Night Vision

When it gets too dark the spotlights shine on low brightness.

Spotless Color Night Vision

When it gets too dark the camera will try to show you the best image possible without using spotlights or IR lights.

Human Detection

Powerful image processing technology quickly finds and classifies human objects, and immediately sends a notification to your smartphone. Monitor what matters without receiving annoying false alerts.

1080P Full HD Video & H.265 Compression

The 1080P sensor and advanced IR algorithms provide crystal clear video both day and night. The cutting-edge H.265 compression reduces network bandwidth and storage usage by 50% at the same video quality.

Active Deterrence

When the Bullet 2S detects an intrusion, 2 built-in spotlights and 110dB siren keeps unwelcome visitors away and alerts you.
