Aprašymas

Unitree G1 Battery

The Unitree G1 battery is a dedicated power source designed specifically for the G1 robot. It ensures stable and safe operation in various conditions. High-performance cells and a capacity of 9000 mAh allow it to provide the right amount of energy for tasks requiring continuous and reliable operation.

Intelligent power management with proprietary BMS

The product is equipped with a proprietary management system (BMS) that controls the charging and discharging processes. It ensures the proper operation and protection of the cells, which translates into extended battery life and predictable robot operation even under intensive use.

Comprehensive security system

Built-in protective features increase the safety of battery use in everyday work. The charge level display allows you to quickly check the energy status, and protections against overcharging, excessive discharge, and short circuits protect sensitive systems. In addition, load detection and self-discharge protection in storage mode are available. All this helps to keep the cells in good condition for a long time.

Manufacturer	Unitree
Model	078554
Dimensions	120 mm × 80 mm × 182 mm
Rated capacity	9000 mAh
Management system	Proprietary BMS
Functions	Energy level display, self-discharge protection in storage mode, charging balance protection, overcharge protection, over-discharge protection, short-circuit protection, load detection
Compatibility	Unitree G1

Gross weight: 2560, Net weight: 1000, Box length: 19,50, Box width: 12,00, Box height: 8,00, GPSR Link: https://psr-assets.innpro.pl/robots/sg_robots__accessories.pdf
